

BEST YET Biting Insect and Tick Repellant: A Cedar Oil Alternative to DEET Products

Used for many years by the Perfume Industry as a fragrance carrier, Texas Red Cedar Oil exceeds performance levels of DEET and other essential oils as a personal insect repellant. When combined with Cosmetic grade Quartz Fluids, Cedar Oil based BEST YET Biting Insect Spray will provide all day protection without the residual of a sticky and uncomfortable topical. No age limitations and a Animal Friendly solution

(PRWEB) June 27, 2006 -- Dave Glassel, President of CedarCide Industries Inc. today announced the introduction of their dynamic BEST YET Biting Insect and Tick Repellent. With the assistance of our product development partner Dow Corning Corporation, CedarCide Industries has succeeded in creating a genuine non toxic alternative to DEET products. BEST YET provides the ultimate in personal relief from Mosquito's, Flies, Ticks, Chiggers, No-See-Um's, Gnats and numerous other biting insects.

A light misting application of this Non Aqueous Quartz Cosmetic fluid spiked with a 5% Cedar Oil active will provide all day protection from biting insects. It will not sweat off like DEET products or other natural insect repellents. BEST YET can be used on children of all ages and animals of any kind. It can be applied directly to the skin or over clothing. It is a clear non staining solution that will leave the skin with a clean smooth and refreshed feeling not found with aerosol repellents.

BEST YET can be used around the house to control those difficult insect invasions by Scorpions, Roaches and Sugar Ants. A quick shot of this solution on the target insect or its nest will result in immediate death to the victim. Treatment of cupboards, pantries and food storage areas are also recommended. Evaporation of the non water base treatment is prolonged providing extended treatment to the area.

BEST YET is a effective coating for window screens and doorways and will provide a barrier of entry from various pests. Application with a Non Thermal fogger will deliver superb insect control results.

BEST YET is a considered a Minimum Risk Pesticide by the EPA and is formulated with FDA food grade ingredients and Cedar Oil. It is Safe to Children and Pets.

BEST YET is available in Quart Spray Bottles and Gallon Refills from the www.Cedarcidestore.com. To order by phone or for more information call 1 800 842 1464. CedarCide anticipates packaging BEST YET in No Hiss Aerosol cans in the near future suggested Dave Glassel, CEO. The Animal Health Industry has requested for several years a aerosol applicator that will not alert Dogs, Cats and Horses when being applied. CedarCide's use of bladder can technology eliminates the need for Ozone threatening propellants and the subsequent hiss during discharge.

BEST YET is formulated without the use of water, a known magnet for mosquitos. The Cedar Oil and Quartz Fluid Carrier provides a healthy luster to the hair and skin of humans and treated Animals. When asked about the name Glassel replied, "In my many years of insect control formulation, this is the best yet!"
